Experience

Project Lead, Product Analyst & UX Designer at Avature - 2023 to present

- Currently leading a cross-functional team in the development of a framework that supports key functionalities across the entire Avature platform. Responsible for project planning, documentation, functional analysis and design to ensure clear priorities and alignment with company-wide objectives.
- Translate feature use cases into functional specifications for over 30 modules by analyzing diverse scenarios and aligning with platform standards.
- Led the redesign of core interfaces and user flows to improve efficiency, transparency, and consistency, leveraging the latest components in the design system and ensuring compliance with accessibility and industry standards.

Lead UX Designer at Bitsion - 2017 to 2021

- Established Bitsion's UX Design process, from research and testing phase to review and launch, still used today by designers, engineers, and all other areas involved in production.
- Led team of 5 designers, reviewing more than 200 screen designs and ensuring established process was followed.
- Designed and implemented the user experience for over 30 clients, ranging from small businesses to multinational companies in 8 of different industries (health, logistics, insurance, e-commerce, digital payments, among others), in Spanish and English.
- Expanded company's offerings to include more complex applications, leading to greater client acquisition.
